

ALARMS & MONITORING

RESIDENTIAL PERS Essence Group has released the EverGuard-Care Personal Emergency Response System (PERS) designed to enable seniors, the chronically ill and adults living with a disability to remain independent in the comfort of their homes. The system is based on both passive and active wireless technology. With an advanced modular system, the addition of sensors (motion, smoke detectors, contact for cabinet or door, etc.) can provide daily activity reporting to professional monitoring services. **To request more info, visit www.securityinfowatch.com/11149813.**

ACTIVITY MONITORING SOLUTION Alarm.com's Wellness solution combines sensors, mobile notifications and home automation to provide a secure and cost-effective option for independent living. Using real-time information

from in-home sensors, the solution notifies family members or designated caregivers of unexpected changes in routines that may indicate an emergency. The system includes a bed presence monitor, panic buttons and sensors that monitor activity. **To request more info, visit www.securityinfowatch.com/11300461.**

INSTALLATION TOOLS AES-Intellinet's Network Connectivity Tool (NCT) and Configuration and Diagnostic Tool (CDT) provide a fast, easy way for dealers and installers to test locations for network connectivity and configure and diagnose the company's alarm monitoring products; thus driving installation costs even lower. Instead of having to pull subscriber units from stock to test field locations, customers can use the NCT (pictured) to evaluate viability; and the CDT accelerates pre-configuration setups. **To request more info, visit www.securityinfowatch.com/11300438.**

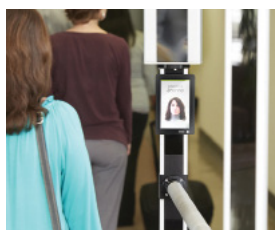

ALARM WIRE WITH PULL-BOX ICE Cable Systems is now offering alarm wire in its Big Mouth Payout (BMP) box, which is constructed of ultra-durable, weather-resistant cardboard (with reinforced handles). For additional installer convenience, the alarm wire incorporates ascending and descending foot-markers, making it effortless for the integrator to identify how much cable has been used and how much remains. **To request more info, visit www.securityinfowatch.com/11296963.**

ACCESS CONTROL

HIGH-VOLUME IRIS RECOGNITION SRI International Sarnoff's IOM PassPort SL product offers a new solution for integrating biometric identification into existing security systems. The product, built on the company's Iris on the Move (IOM) technology, includes face capture and dual-iris recognition components, and can

be integrated directly into turnstiles, infrastructures or entrances. With a processing speed of 30 people per minute, the system is ideal for high-volume applications including transportation, sporting events and more.

ACCESS CONTROL SOFTWARE Keyscan's new Aurora Access Control Management software features a completely rebuilt and redesigned user interface and leverages the expanded processing power and capabilities built into Keyscan's most recent line of access control units. A "people-centric" management methodology assigns multiple

credentials and permissions to a person. Other features

include a 10GB database limit, support for Microsoft SQL Servers, simultaneous communication to all IP nodes, a schedule management (time zones) feature and more.

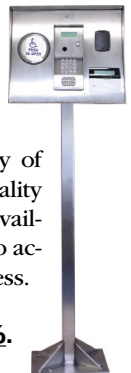

To request more info, visit www.securityinfowatch.com/11300475.

SMART RESIDENTIAL DEADBOLT Kwikset's SmartCode 914 Deadbolt with Home Connect technology brings enhanced design features, and new certifications and capabilities when paired with Z-Wave-based home automation systems. The design offers a new exterior style and reduced interior size for enhanced aesthetics. With a completely redesigned quiet-drive locking system, the deadbolt blends technology and performance while complementing the aesthetics of a home.

ACCESS CONTROL PEDESTALS Chase Security Systems custom designed pedestals can fit a combination of access control and other devices. A single enclosure houses equipment such as cameras, card readers, keypads and more.

It is designed to be used in a variety of public locations where both functionality and aesthetics count. Pedestals are available in a variety of finishes and sizes to accommodate pedestrian or vehicle access.

STANDALONE DOOR CONTROLLER Kantech, a unit of Tyco, introduces the ioPass SA-550 Stand Alone Door Controller for use in small security applications. Ideal for convenience stores, storage rooms or parking lots, the product brings the reader and controller together in an easy-to-use, software-free solution. The unit offers an integrated 26-bit Wiegand ioProx proximity card reader that can store up to 1,000 users. For ease of installation, the unit is programmed directly from the keypad. **To request more info, visit www.securityinfowatch.com/11293665.**

VIDEO SURVEILLANCE

HD CAMERAS Avigilon's HD Pro camera series delivers high-resolution images with the company's next-generation bandwidth management technology to effectively provide maximum detail and coverage of expansive areas. Available in 8 MP, 12 MP and 16 MP resolutions, the camera provides detailed coverage of vast areas with fewer conventional cameras required. Avigilon's new H4 platform combines H.264 technology with the company's proprietary High Definition Stream Management (HDSM) technology, HDSM 2.0. **To request more info, visit www.securityinfowatch.com/11297016.**

UPGRADED MEGAPIXEL CAMERA LINE IQinVision has released the next generation of its IQeye Alliance-mx HD megapixel cameras. Designed for both indoor and outdoor use, the cameras include the increased processing power needed to run analytics or VMS applications at the edge. They also feature WDR, built-in IR illumination, on-camera storage, two-way audio and true day/night capability, and come available in H.264 Main Profile vandal dome models with support for HD720p, HD1080p and 3MP resolutions (5MP coming in March). **To request more info, visit www.securityinfowatch.com/11297080.**

REMOTE MAINTENANCE OPTION BCDVideo has added a new technological feature to its Nova Series IP Video Recording servers designed to save the integrator both time and money — an embedded, password-protected flash memory module. This system enhancement, named SMARTVMS, allows the integrator to capture their VMS project system settings in a protected

By supporting Mission 500, you can join the legions of security professionals who are donating their time and resources to help improve the lives of children around the world. Just \$35 a month provides food, education and healthcare services to a child in need. A small investment in our collective future. Together with Mission 500 we can make a difference.

mode internal to the server. The device can be accessed remotely for system restore or any necessary modifications without the expense of an on-site call. **To request more info, visit www.securityinfowatch.com/11300547.**

VIDEO SYSTEM MANAGEMENT SOFTWARE

Exacq Technologies, a unit of Tyco, has released Enterprise System Manager (ESM), a browser-

based health monitoring system that monitors the health and status of exacqVision servers and cameras on the network. An intuitive dashboard interface can be accessed via computer or mobile device. With the ESM application, exacqVision users instantly receive an email notification in the event of system errors or warnings. It also enables the scheduling of software updates for of recorders during non-peak hours.

ENHANCED NVR Sentry360's sentryEdge NVR devices combine a server and smart network switch in one product. The appliance allows for flexible video management software options as well as versatile storage options such as NAS, RAID or other third-party systems. The unit comes pre-installed with sentryView configuration software, which allows users to automatically assign IP addresses, gateway, subnet, image quality and motion detection settings, which can then be exported to the video management software of choice.

OUTDOOR HIGH-SPEED DOME

Engineered to provide broad surveillance coverage outdoors, Toshiba Surveillance & IP Video Products' IK-WP41A Pan-Tilt-Zoom (PTZ) IP dome camera features full 1080p HD video resolution, 20x optical zoom to help identify distant objects, 360° continuous pan for overview surveillance, along with high-speed PTZ to precisely follow moving objects. The camera's self-contained IP66-rated weatherproof housing protects sensitive electronics from adverse conditions. Power over Ethernet Plus (PoE+) 802.3at further simplifies installation.

RECORDING APPLIANCE (VIDEONETBOX II)

The VideoNetBox II from Dallmeier is a compact appliance for the recording of up to 8 IP video channels that offers improved performance and a more open platform than its predecessor. With a higher-performance processor, all eight channels can now be recorded in real-time in HD quality (720p). Pre-installed SMAVIA Recording Server software is an open platform that enables third-party IP cameras with motion detection to be recorded and configured using the ONVIF protocol.
