

ASIS 2015 New Security Products Straight From the Show Floor

3M Booth #1657

The 3M CR5400 Double-Sided ID1 Reader verifies and authenticates driver's licenses, municipal ID cards, insurance cards and more. Users simply drop in an ID and the reader checks it in less than four seconds, reading the front and back simultaneously to compare the printed region, barcodes and magnetic stripe data.

Request more info at www.SecurityInfoWatch.com/12078151

3VR Booth #2948

The 2100-Series ATM NVR from 3VR has been designed with financial institutions in mind. Its small size and 40°C operating temperature make it ideal for small installations where space is a premium and high-heat can be an issue. It supports four IP cameras, and comes pre-loaded with VisionPoint VMS.

Request more info at www.SecurityInfoWatch.com/12052347

3xLOGIC Inc. Booth #3267

3xLOGIC Inc. has expanded its line of VISIX IP cameras to include standard dome, bullet and mini-dome camera models. Targeted at the SMB market, the all-in-one, edge-based IP cameras are full-featured, VMS and advanced analytic capable. The cameras' embedded analytics use algorithms that automatically self-adjust, so the user can concentrate on detection rules.

Request more info at www.SecurityInfoWatch.com/12105935

Aiphone Booth #1623

Aiphone's IX Series is a network-based, all-in-one communication and security control system. Features include video identification, emergency calling, ONVIF video streaming, access control, and public address. The mobile app can receive calls from any IX Series device including the IX-MV master and all door and emergency stations.

Request more info at www.SecurityInfoWatch.com/12037936

Allegion Booth #2838

The ENGAGE Gateway from Allegion is designed to be used with devices including Schlage NDE Series wireless locks, to deliver real-time networked connectivity with NDE alliance partner systems. Each gateway can support multiple devices for a wide range of applications, including interior suite entries, offices, conference rooms and sensitive storage areas.

Request more info at www.SecurityInfoWatch.com/12106051

Altronix Booth #701

Altronix's LINQ Network Communication Technology fills the void in network communications for mission-critical power distribution applications by enabling remote monitoring, control, reporting and power of IP devices. It also monitors diagnostics and reports via email/SNMP notifications to reduce service calls and system downtime while creating RMR opportunities for integrators.

Request more info at www.SecurityInfoWatch.com/12064212

AMAG Technology Booth #2111

AMAG Technology will display the Symmetry CompleteView Video Management System version 4.5, developed in partnership with Salient Systems. The VMS includes a suite of

software tools called Dynamic Video Management, designed to increase efficiency and enhance the end-user's experience, including: Dynamic Resolution Scaling, Dynamic Video Decoding and Dynamic Frame Throttling.

Request more info at www.SecurityInfoWatch.com/12106151

American Dynamics (Tyco Security Products) Booth #1701

The victor Video Management System from American Dynamics significantly reduces the time needed by investigators to organize and manage events and create incident reports. A case management tool enables the holistic management of alarms, reporting and video-associated alarms and investigations from such systems as access control, intrusion, fire, intercom, elevator and HVAC systems.

Request more info at www.SecurityInfoWatch.com/12106040

Take the first step toward total access control - Get fit with Kaba.

The first step toward total access control is choosing a solution that performs as designed. At Kaba, we design access solutions that fit our customers' specific needs for security, organizational efficiency and operational convenience.

Keyscan Aurora access control management software offers unmatched feature-to-price ratio as well as, system scalability, flexibility and performance. Our single software solution has no service governors restricting its use. The software will drive access control systems from one door in a single location, to 10,000 doors in multiple locations - worldwide. What's more,

Aurora easily integrates with high-end third party systems, regardless of project size or scope.

See us at ASIS Booth #1109 for a complete evaluation of your access control fitness.

When performance counts-get fit with Kaba.

American Science & Engineering (AS&E) Booth #1033

For customs agencies and high-threat facilities, AS&E's Z Portal system is the only drive-through cargo and vehicle inspection system

utilizing multiple detection technologies for up to six views of scanned vehicles. It provides high-throughput inspection in a more compact, construction-less footprint that is well suited for real-world applications.

Request more info at www.SecurityInfoWatch.com/12105659

Antaira Technologies Booth #2175

Antaira Technologies' LNP-0702G-SFP and LNP-0702G-SFP-24 series is a 7-port industrial PoE+ gigabit unmanaged Ethernet switch, with 48~55VDC high voltage power input (LNP-0702G-SFP) and 12~36VDC low voltage power input (LNP-0702G-SFP-24). Each unit is designed with five gigabit Ethernet ports that are IEEE 802.3at compliant (PoE+) on ports 1-4 (maximum 30W/port).

Request more info at www.SecurityInfoWatch.com/12105589

Arecont Vision Booth #817

Arecont Vision's all-in-one SurroundVideo G5 panoramic multi-sensor megapixel cameras include the 5MP SurroundVideo G5 with STELLAR (Spatio Temporal Low Light Architecture) technology and remote focus P-iris lenses. Standard and smaller form factor versions of 12MP and 20MP cameras have also been added, each with double the frame rate of previous models.

Request more info at www.SecurityInfoWatch.com/12064363

ASSA ABLOY Booth #2815

ASSA ABLOY will showcase HID Mobile Access support for access control locks from Corbin Russwin and SARGENT. This enables the ability to use mobile devices enabled with Bluetooth Smart and NFC credentials with the IN120 WiFi lock, Access 700 and Passport 1000 PoE and WiFi locks, and the SE LP10 Integrated Wiegand lock.

Request more info at www.SecurityInfoWatch.com/12105689

Avigilon Booth #3027

Avigilon will showcase the security industry's first single-sensor 7K (30 megapixel)

security camera at ASIS 2015. The 7K HD Pro camera simultaneously provides maximum scene coverage while minimizing bandwidth and storage consumption, redefining the industry standard for high-resolution imaging. The company will also display the 6K (24 MP) HD Pro camera.

Request more info at www.SecurityInfoWatch.com/12105595

Axis Communications Booth #1713

The AXIS Q3709-PVE from Axis Communications provides situational awareness of a large area, making the camera ideal for city surveillance applications, as well as in installations in stadiums, airports and train stations. Installation is easy, reliable and cost-efficient. The camera provides a perfect 180° overview in up to 33 megapixel resolution.

Request more info at www.SecurityInfoWatch.com/12105771

BCDVideo Booth #1509

BCDVideo has released the second-generation of its SMARTcontrol Management Suite system-monitoring package, which comes standard

on its enterprise access control and video recording platforms. The software makes troubleshooting easy and saves time by indicating what needs attention. The performance panel allows a single-pane view into the system, graphing and logging performance.

Request more info at www.SecurityInfoWatch.com/12090383

Boon Edam Booth #3100

Boon Edam's Speedlane Lifeline Series product range consists of three models — the Slide, Swing and Open — each of which is available in a variety of options. Whether for a higher level of security or to create easier disabled access, numerous combinations are possible. A modular design means the product is highly customizable.

Bosch Booth #1209

The new IP 4000 and IP 5000 cameras from Bosch are easy to install and set up and are available in a wide selection of indoor and outdoor models to suit any facility or application. The IP 5000 family

offers resolutions up to 5 megapixel, and the lower-cost IP 4000 family offers great performance at 720p resolution.

Request more info at www.SecurityInfoWatch.com/12084080

Brivo Booth #3301

Brivo Phone Pass app enables the ability to access secured areas with a mobile device. A new feature of Brivo OnAir, the app extends cloud-based access control to cardholders. As a digital token with built-in authentication, the app eliminates the need for physical keys and access cards.

Request more info at www.SecurityInfoWatch.com/12106157

Canon USA Booth #3239

Canon USA Inc., will display nine new 1.3 MP Network Video Security cameras, including three new Speed Dome models. The speed domes include two outdoor cameras with weather- and vandal-resistant protective housings, 360° endless panning with a fast and accurate pan/tilt mechanism, and a 30x optical zoom lens. The VB-R10VE model is pictured.

CEM Systems

(Tyco Security Products) Booth #1701

The AC2000 v.7 emerald intelligent access terminal from CEM Systems includes personal messages displayed to cardholders when cards are swiped. Intercom software can now be deployed as a standalone installation on dedicated intercom workstations where full system functionality is not required. It validates cards using any online reader, simplifying the enrollment process.

Request more info at www.SecurityInfoWatch.com/12060730

Comm Port Technologies Booth #352

Comm Port Technologies will introduce enhanced models of its FLEX and CPAS Under-Vehicle Security Systems at ASIS 2015. Both have been re-engineered to support up to 78 Ton weight capacity with no additional cost to the user. The systems enable security personnel to view the length of a vehicle in real-time and full color.

Request more info at www.SecurityInfoWatch.com/12105597

ComNet Booth #2767

ComNet has expanded the NetWave wireless Ethernet line with a smaller sized "mini" Hardened Wireless Ethernet link. It is available as an individual point-to-multipoint model and as part of the exclusive ComNet point-to-point NetWave kit, the standard NWK1m kit and the high-throughput NWK7m kit. It can be used over distances of up to two miles.

Request more info at www.SecurityInfoWatch.com/12105699

Detex Booth #2601

Exclusive to Detex, the ECL-230X is built for maximum strength and is the strongest hardware in its class. Independent pull testing proves the ECL-230X-TDB-DX3 withstands more than 16,000 pounds of pull force. It is ideal for back doors requiring alarmed panic hardware and high-level protection from break-ins.

Request more info at www.SecurityInfoWatch.com/10271908

Diebold Booth #1901

Through a customizable online dashboard, Diebold's SecureStat system provides a holistic view of a security system. The online management tool delivers a unified view, control and measurement of an entire security platform including disparate intrusion, access, video and fire systems from a secure, equipment agnostic, advanced consumer web technology and native browser interface.

Digital Watchdog Booth #531

Digital Watchdog will display its new AHD (Analog High Definition) products, the VMAX AHD CORE DVRs and STAR-LIGHT AHD Cameras. The cameras use coaxial cables to transmit detailed 1080p images at 2.1MP resolution. Features include P-Iris lens, double shutter Wide Dynamic Range (WDR) and true day/night with mechanical IR cut filter.

Request more info at www.SecurityInfoWatch.com/12106065

DoorKing Booth #739

DoorKing has introduced a new cellular add-on product for its telephone entry and access control systems. The cellular service provides both voice and programming via PC over the AT&T 4G LTE cellular network. The cellular connection service provides voice communication for the entry system as well as for programming functions.

Request more info at www.SecurityInfoWatch.com/12105735

Dortronics Booth #331

The 4700 Series Interlock Controllers from Dortronics incorporate a watchdog circuit that constantly monitors operation and LED indicators for input-output connection status, and system busy or system idle confirmation. Additional features include interlock violation alarm relay output; 4 DPDT relays; and custom-programmable propped door, panic release and door unlock timers.

Request more info at www.SecurityInfoWatch.com/12064375

DSC (Tyco Security Products) Booth #1701

DSC Touch, an all-in-one smart panel, offers security, life safety and home control technology supported by Alarm.com interactive services for security,

video monitoring, energy management and home automation. It features a 7-inch touchscreen. Android-based software supports custom text-to-speech sensor names and language localization. Cloud-based firmware upgrades are managed remotely.

Request more info at www.SecurityInfoWatch.com/12081924

DVTel Booth #609

The ioi Thermal Camera with built-in military-grade analytics from DVTel is designed for perimeter protection, providing automated detection in fog, haze, smoke and complete darkness. A single unit supports power, control, video and analytic events through one cable, simplifying installation requirements and reducing total cost of ownership.

Request more info at www.SecurityInfoWatch.com/11305369

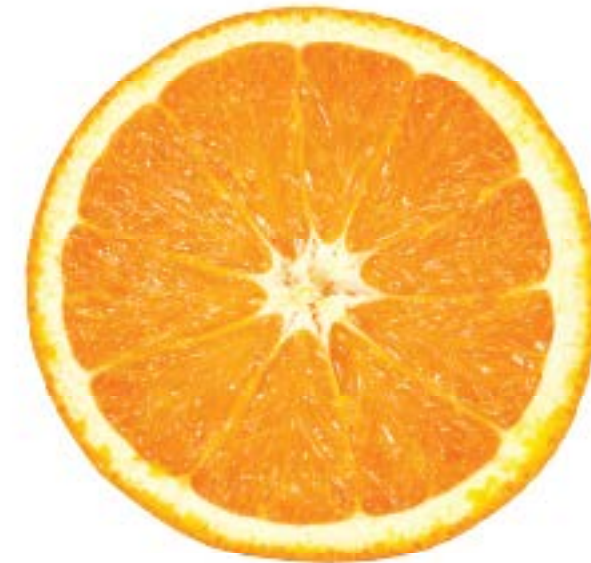

EIZO USA Booth #2269

EIZO USA will display the DuraVision FDF2304W-IP monitor for security and surveillance equipped with technology that connects up to 16 cameras with no computer or additional software required. It offers five different video layout options and produces highly visible images by brightening dark areas and keeping light areas from becoming washed out.

Elpas (Tyco Security Products) Booth #1701

Elpas' Low Frequency Beacon is a flexible solution for hands-free access control and asset security. The Beacon excites Elpas active credentials at tuneable ranges of between 0 and 5m for sub-second door control. It contains I/Os for door position monitoring and lock control plus a Wiegand port for integration

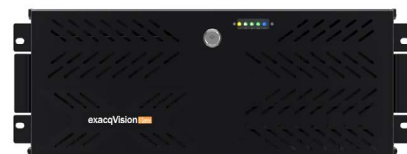

with third-party access systems.

Request more info at www.SecurityInfoWatch.com/12105989

Exacq Technologies (Tyco Security Products) Booth #1701

The exacqVision Z-Series network video recorders offer high performance, reliability and capacity for demanding video surveillance applications. They store up to 120TB of video, adding 50 percent to maximum storage capacity. The hybrid and IP camera NVRs record up to 128 IP cameras and 64 analog cameras and include 8 IP camera licenses.

Request more info at www.SecurityInfoWatch.com/12018103

FLIR Systems Inc. Booth #2411

FLIR's TCX Thermal Bullet features high-performance, high-resolution thermal technology for intrusion detection and visual awareness day or night. The camera combines 24/7 high-contrast thermal video and high-performance built-in video motion detection with strong integration flexibility. It comes in two resolution options: 480 x 360 resolution

with a 90° lens, and 320 x 240 resolution with a 50° lens.

Request more info at www.SecurityInfoWatch.com/12084092

GAI-Tronics Booth #3253

GAI-Tronics introduces the new Commander 3G GSM Cellular Telephone that is certified for use on the AT&T network. Its weatherproof housing and rugged construction make it suitable for use in extreme environments. It is FCC and IC compliant and can be powered via local power or a direct connection to a solar panel.

Request more info at www.SecurityInfoWatch.com/12106212

Galaxy Control Systems Booth #2649

Galaxy Control Systems' System Galaxy Software interfaces with all legacy Galaxy products. It includes active directory support for real-time

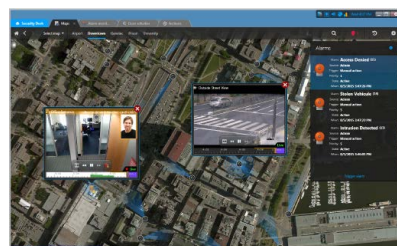

identity management, individualized identity-based door access, audit reports for each screen view or credential holder, and one-minute door open schedules with 100 additional day types. Share data with visitor management, time clocks, garages and more.

Request more info at www.SecurityInfoWatch.com/11703686

Genetec Booth #2639

At ASIS 2015, Genetec will introduce Security Center 5.4. To enhance system security and protect organizations from external threats, it will provide advanced capabilities to implement digital certificates and new video encryption methods. It will also offer support for H.265, and features a completely redesigned version of its native mapping system, Plan Manager.

Request more info at www.SecurityInfoWatch.com/12105727

HES (ASSA ABLOY) Booth #2815

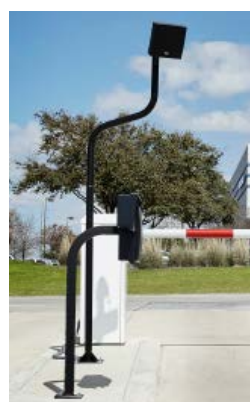

The new 9700 Series electric strikes from HES, an ASSA ABLOY Group company, is an addition to the surface-mounted 9500 and 9600 Series. The strike combines both windstorm and fire ratings into one solution and is designed to accommodate the Corbin Russwin SecureBolt and Yale Square-Bolt exit devices — heavy-duty solutions ideal for frequent-use applications.

Request more info at www.SecurityInfoWatch.com/12105663

HID Global Booth #2613

HID Global's extended-range high frequency and long-range ultra-high-frequency (UHF) solutions enable a single card to open doors as well as access parking gates from a distance. The product line includes two rugged and weather-resistant readers optimized for outdoor use. The iCLASS SE U90 Long Range reader operates at distances of up to 15 feet.

Request more info at www.SecurityInfoWatch.com/12105607

Hikvision Booth 2153

Hikvision's 1080P TurboHD varifocal dome camera (DS-2CE56D5T-AVPIR3) uses HDTVI technology to send a high-definition signal over coaxial cable at distances of more than 1,500 feet. It is ideal for users leveraging original infrastructure while still deploying high-definition video. With ratings of IP66 and IK10, it offers high performance in harsh environments.

Request more info at www.SecurityInfoWatch.com/12052364

Honeywell Security Group Booth #901

MAXPRO VMS is an intelligent management solution that maximizes investments by leveraging existing video infrastructure. By bringing analog and network video, access

control and third-party systems together into one command and control interface, security professionals can manage multiple locations with disparate recording systems under a single display for

maximum flexibility, customization and integration.

Request more info at www.SecurityInfoWatch.com/10217681

IDIS Booth #3401

IDIS will feature the latest innovations under its flagship DirectIP range, including the DR-6316P-S 4K H.265 NVR. The NVR features network

throughput up to 310Mbps, in addition to 4K video out capability and support for H.26, enabling either a doubling of storage capacity or image quality for the user.

Request more info at www.SecurityInfoWatch.com/12105573

INEX/ZAMIR Booth #3901

The IZA500 ALPR Automatic License Plate Recognition Camera System from INEX/ZAMIR combines two

sensors (B&W and color), a quad core processor and ALPR software in a single unit, with GPS coordinates and streaming

video included. It maintains high accuracy in all lighting and weather conditions at vehicle speeds of up to 150 mph.

Request more info at www.SecurityInfoWatch.com/12105545

IPVideo Corp. Booth #4039

IPVideo Corp., has introduced the NomadHD, a 3MP video camera, rechargeable battery and WiFi/4G modem within a custom housing that can be quickly and easily installed on any smooth surface without tools. It can be deployed in seconds, providing immediate, temporary surveillance video — serving as a theft deterrent and forensic tool.

Request more info at www.SecurityInfoWatch.com/12106168

Iris ID Systems Booth #3053

Iris ID Systems will introduce the IrisAccess iCAM 7000S Series iris recognition cameras at ASIS. They are plug-compatible replacements for the widely used iCAM cameras and offer more features, applications, and integration flexibility than previous models. The new cameras are twice the speed of the previous cameras, while providing added accuracy.

ISONAS Booth #3957

The ISONAS PowerNet IPBridge allows you to transition customers from a Wiegand panel system to a Pure IP-based solution without a rip-and-replace. Traditional and IP-enabled panels can be replaced by unplugging existing panels and attaching Wiegand readers directly to the IP Bridge, enabling a simple transition path to future access control needs.

Request more info at www.SecurityInfoWatch.com/12106201

Kaba EAC Booth #1109

Kaba EAC's Keyscan Aurora access control management software supports any access control deployment regardless of project size or scope. The one-platform hardware and software interface features simplified database creation and maintenance; a 10GB database limit; simultaneous communication to all IP nodes; active mapping; optional license and add-on modules; and more.

Request more info at www.SecurityInfoWatch.com/11300475

KBC Networks Booth #3922

KBC Networks will feature its new generation of ThruLink products, which allow real-time, encrypted video, audio and data to be transmitted over public networks. The new product series now includes standard and standard plus models, for up to four cameras, as well as high capacity units designed for large-scale applications.

Request more info at www.SecurityInfoWatch.com/12053188

Lenel (UTC Building & Industrial Systems) Booth #3901

The new Lenel OnGuard WATCH (Web Access Trending & Comprehensive Health) web-based dashboard offers an intuitive interface to analyze important system data. As a forensic analysis tool, it provides users with a quick overview of the OnGuard system and essential system performance information. It helps security and IT professionals make quicker and smarter decisions.

Request more info at www.SecurityInfoWatch.com/12106145

LifeSafety Power Booth #3515

The FlexPower Gemini RGM series from LifeSafety Power is a UL-Listed, rack-mount product providing both operating power and a mechanical housing for Mercury Security access control components. The enclosure is configured to save space and save the installer time with Mercury panels, system power and optional lock power in a single housing.

Request more info at www.SecurityInfoWatch.com/12106107

Logic Supply Booth #1275

Logic Supply will display its MX1000 Rugged Mobile NVR, which has been certified by Milestone Systems for use with the XProtect VMS platform. Features include an extended operating temperature range, a completely fanless and ventless chassis, low-power requirements and variable power capabilities for transportation applications.

Request more info at www.SecurityInfoWatch.com/12092150

Louroe Electronics Booth #2031

The Gunshot Detector from Louroe Electronics uses audio detection to accurately classify gunshots. The algorithm was trained with thousands of gunshot recordings from firearms including handguns, shotguns, rifles and automatic rifles. When used together with Louroe's A-ML microphone, the unit is able to detect gun

discharge up to 3,000 feet in quiet environments.

Request more info at www.SecurityInfoWatch.com/12106236

March Networks Booth #1121

March Networks' MegaPX is a self-contained, High Dynamic Range (HDR) IP camera purpose-built for ATMs. It captures clear video in direct sunlight, near-dark and other high-contrast lighting so images are never washed-out or over-exposed. The camera combines all components in a single housing measuring just 2.2" x 2.3" x 2.7".

Request more info at www.SecurityInfoWatch.com/12105958

MicroPower Technologies Booth #3273

SOLVEIL HD is MicroPower's newest wireless, solar-powered surveillance system that delivers high-resolution video coverage in perimeter and outdoor areas for enhanced security and operations monitoring. Operating on just ¾ Watt of power, it captures and transmits live video up to ½ mile away with a single charge of its integrated battery pack.

Request more info at www.SecurityInfoWatch.com/12052704

Milestone Systems Booth #3222

Milestone Systems has enhanced the Milestone Husky M10, the smallest of its Husky network video recorders (NVRs). Video Push enables a smartphone or tablet to act as a mobile security camera, pushing video to the network video appliance. The unit now comes in configurations with 4 or 8 channels and up to 2 TB storage.

Paxton Access Booth #445

Paxton Access will showcase the next generation of Net2 Entry, its door entry system, including two new panels and updated software. The latest versions feature MIFARE technology, a new intuitive panel interface and digital pan/tilt camera functionality. It combines audio, video, access control and power all via one cat5 cable.

Request more info at www.SecurityInfoWatch.com/12106078

Pelco by Schneider Electric Booth #4208

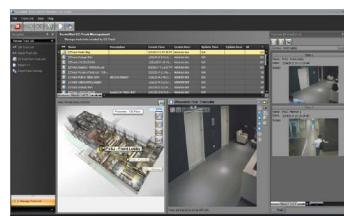

Pelco by Schneider Electric's Optera panoramic cameras with SureVision 2.0 WDR imaging technology combine situational awareness with blended panoramic views, creating an immersive surveillance experience. The cameras provide excellent low-light performance and true Wide Dynamic Range (WDR) at the same time, along with anti-bloom technologies, 3D noise filtering and advanced tone mapping.

Request more info at www.SecurityInfoWatch.com/12105636

PlateSmart Technologies Booth #1729

PlateSmart's ARES is an end-to-end solution for video analytics based on automatic license plate recognition (ALPR). A software-only product, it is hardware-agnostic and works with most video surveillance cameras. It integrates seamlessly with most VMS, turning any camera connected to these systems into an ALPR camera.

Request more info at www.SecurityInfoWatch.com/12106230

ational awareness and communication capabilities through enterprise dashboards, contact management and social media integration. A new Analysis Module raises operator alarms based on correlated events that are separated by time or space without the clutter of extraneous alerts.

Request more info at www.SecurityInfoWatch.com/12102384

Quantum Secure Booth #3801

Quantum Secure's SAFE Visitor Kiosk manages the entire lifecycle for visitors. Ideal for reception areas and unmanned lobbies, the kiosks' easy-to-use interface with comprehensive on-board support speeds-up the check-in process. It generates custom badges for visitors and employees, and can be readily integrated with a variety of peripherals.

Smiths Detection Booth #2701

Smiths Detection's IONSCAN 600 explosives trace detector is designed for use in global aviation and critical infrastructure security. The small, portable design features a proprietary non-radioactive Ion Mobility Spectrometry (IMS) source which eliminates the need for special licensing, handling or disposal requirements. The unit's hot-swappable battery provides continued sampling and analysis capability.
