FEATURED EXHIBITOR

Platinum Tools
Booth #3037

The PoE+ 10Gig Shielded RJ45 Field Plug (p/n 106250) from Platinum Tools optimizes data throughput to PoE+ powered devices. Compatible with a wide assortment of large cables with large conductors, its cast-metal shell provides end-to-end shielding from extraneous noise interference in high-bandwidth applications. Usable for Cat7/6A/6, no special crimp tool is required. They are UL and RoHS compliant. Visit booth #3037 at ISC West and enter daily to win a termination kit (one winner per day of the show).

FEATURED EXHIBITOR

Flair Electronics
Booth #24134

Flair Electronics has added two sensors to its WaterGuard leak detection devices (1010-H2OS-EN1751 and 3010-H2OS-EN1751). These sensors connect directly to the Inovonics EN1751 transmitter with 15 ft. of jacketed cable. An alarm is triggered whenever water or other conductive fluid rises 1/16 of an inch and bridges two of the nickel-plated probes. The 1010-H2OS attaches directly to a baseboard with screws or can be stuck to the side of a pan with double-sided tape. The 3010-H2OS is heavy enough to sit on the ground under a water heater or sink without moving.

AlertEnterprise
Booth #26099

AlertEnterprise Visitor Identity Management enables fast and efficient on-site registration, email and web pre-registration; self-service kiosks; and optional facial recognition technology for a frictionless customer experience. Real-time vetting against watch lists and automated, policy-driven background checks validate visitors and contractors before granting access.

Request more info at www.securityinfowatch.com/21124689

Allegion
Booth #17089

Schlage Control mobile enabled smart locks with Bluetooth mobile credential compatibility enable multi-family property managers to differentiate by offering a convenient way for authorized guests to unlock resident unit doors. Its open architecture gives users the freedom to choose any physical access control software (PACS) provider.
Request more info at www.securityinfowatch.com/21124104

Altronix
Booth #11073

Altronix Tango8A, Tango8P and Tango8AP deliver 12VDC and 24VDC simultaneously over 8 or 16 outputs for powering access control and security devices. Powered by any 802.3bt PoE source up to 90W, it eliminates the need for an electrician, dedicated conduit and wire runs.

Request more info at www.securityinfowatch.com/21124730

Alula
Booth #22043

The Slimline Touchpad from Alula controls every aspect of a modern security system, delivering at-a-glance control of video cameras, Z-Wave devices and sensors. The 7-inch color touchscreen automatically speaks zone changes and tells users what is happening in and around their property. The interface matches the Alula App.

Request more info at www.securityinfowatch.com/21115562

AMAG
Booth #14089

Symmetry Business Intelligence is a robust analytics engine from AMAG designed to provide critical information via data analysis. It uses data from an access control system to analyze a person's access activity and establishes patterns based on a risk score methodology. Anomalous behaviors are flagged in a dashboard.

Request more info at www.securityinfowatch.com/21124702

CyberLock
Booth #27117

CyberLock has developed the CyberKey Blue 3, which gives users ultimate flexibility when it comes to updating their access permissions. Designed with a mobile workforce in mind, the latest Bluetooth-enabled CyberKey controls access to isolated sites and sprawling facilities. It enhances system security by supporting temporary access and delayed activation, extending precise access control features to the most remote of locations. Users can request access permissions within cellular range, cache permissions via the CyberAudit Link app, and later activate the key outside of cellular range.

Request more info at www.securityinfowatch.com/21125171

Nightlock Door Security Devices
Booth #22136

Nightlock Lockdown 1 uses the strength of the floor to withstand force of 2,000 lbs., on a door that opens inward and 1,600 lbs., on doors that open outward.

On a conventional door, an intruder or active shooter can break a door window, reach in, and gain access to the doorknob lever; however, with the Lockdown 1 at floor level, it is out of reach. The system comes with easy instructions, wall storage box, matching screws and plastic anchors for mounting on ceramic tile, marble or concrete floors.

Request more info at www.securityinfowatch.com/12400251

Arcules
Booth #31081

Arcules Video Surveillance-as-a-Service (VSaaS) and Access Control-as-a-Service (ACaaS) service bundle provides video analytics and advanced management of video surveillance data and access control information in one unified solution. Users can correlate video data with access control events and authorize access to grant or restrict permissions through the Arcules portal.

Boon Edam
Booth #8037

The Speedlane Compact from Boon Edam provides all the safety and security you expect from a security turnstile in a small footprint. A short V-shaped cabinet with an ergonomic design optimizes the use of valuable floor space and the swing-motion glass barriers coordinate with building décor and design.

Request more info at www.securityinfowatch.com/21124152

BriefCam
Booth #11121

The BriefCam Mobile Application, which runs on both Android and iOS devices, enables law enforcement and security personnel to maximize the value of their surveillance camera investments by making video searchable on-the-go. It is an extension of the company's Video Content Analytics Platform.

Request more info at www.securityinfowatch.com/21115371

Camden Door Controls
Booth #29079

Kinetic by Camden Door Controls is a 900 MHz power harvesting wireless system that uses the energy created by the operation of the switch to power the wireless transmitter. It features an ultra-compact receiver (easily installed in automatic door operator cabinets), with field-selectable momentary, delayed or latching relay operation.

Request more info at www.securityinfowatch.com/21093267

CDVI
Booth #20001

U4GO from CDVI Americas is a high performance UHF (902-928 MHz) integrated system that provides secure long-range access for vehicles and pedestrians in applications such as parking facilities, gated communities, campus' and rolling stock. A high security protocol (AES128) RF module can manage up to 100 remote transmitters.
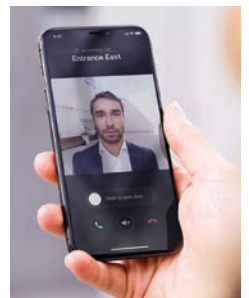

Request more info at www.securityinfowatch.com/21124720

Commend Inc.
Booth #13115

Symphony from Commend Inc., is a cloud-based intercom security platform ideal for door/gate communication and control for residential associations, property developers and operators of large-scale buildings. it can automatically detect devices on the network, which makes it possible to centrally configure and manage complex building communications.

Request more info at www.securityinfowatch.com/21124897

Shooter Detection Systems (SDS)
Booth #24099

The next generation in gunshot detection has arrived with Guardian Wireless, a patent-pending wireless/battery-powered gunshot sensor meeting market demand for a secure and reliable wireless gunshot sensor option. Leveraging the proven technology from the Guardian PoE sensor, Guardian Wireless is powered by a lithium battery pack, making it 100% wire-free, with an optional DC power input as a redundant power option. This third-generation sensor from SDS is connected by a secure long-range wireless technology that maintains a regular system heartbeat, ensuring optimum system uptime as the sensors scan the environment for shots while filtering out false alerts.

ComNet
Booth #5071

ComNet's 12-port Gigabit managed Layer 2 switch includes two 10GigE uplink ports for high-bandwidth requirements such as smart cities and connected vehicle applications. The CNXE2GE2TX8MSPOE features eight 10/100/1000BASE-T(X) RJ-45 ports compliant with IEEE802.3af/at PoE, two dedicated 100/1000/2.5GBASE-X SFP ports and two dedicated 1000/2.5G/10GBASE-X SFP ports.

Request more info at www.securityinfowatch.com/21083688

Cypress Integration Solutions
Booth #6059

The Cypress OSM-CPI Interface is used to retrofit a Wiegand controller to interface with an OSDP reader. Its inputs control a connected peripheral device's LED/buzzer, as well as a tamper output. Upgrading to SIA's OSDP standard encrypts the reader connection to prevent hacking and ensures future device compatibility.

Request more info at www.securityinfowatch.com/21124733

Dahua Technology USA
Booth #14039

Dahua's LincX2PRO series includes a video doorbell (DHI-DB11), mini camera (IPC-C26EN) and floodlight camera (IPC-L26N) that can be operated using its DMSS app. An excellent addition to residential and small business installations, this suite of products integrates with Alexa and records directly to an SD card, NVR or DVR.

Request more info at www.securityinfowatch.com/21124974

Delta Scientific
Booth #7045

Delta Scientific's bolt down DSC7090 beam barricade has passed crash tests to garner an ASTM M30/P1 rating, meaning it will stop a 15,000 pound truck going 30 mph. Raising in only five seconds and lowering in two seconds yields a cycle rate of 100 vehicles in and out per hour.

Request more info at www.securityinfowatch.com/21114117

Digital Watchdog
Booth #25089

DW Spectrum IPVMS v4.0 includes new features such as virtual offline cameras, failover for storage, secure video export, updated user experience and a more intuitive interface. It supports H.265 for ONVIF devices, webcams (built-in and USB), custom watermarks over videos, and more.

Request more info at www.securityinfowatch.com/21109955

Theia Technologies
Booth #7056

Theia Technologies will feature its family of 4K lenses, the SL410 (4-10mm) and SL1250 (12-50mm). They are compatible with 4K cameras including models from Arecont, FLIR, Hanwha, Honeywell, Dahua and Vivotek. The lenses cover up to 1/1.7" 4K image sensors and resolve the smaller pixels of the 1/2.3" 4K sensors. At 64.5mm long by 59mm diameter they are compact enough to use in domes, bullets and smaller housings and are available in motorized, manual, DC auto-iris, P-iris, and CS or D25 board mount versions.

Request more info at www.securityinfowatch.com/12399899

TownSteel
Booth #12136

The unique double-lock keyless technology of TownSteel's e-Genius 5000 BLE Smart Interconnect Lock connects maximum strength and security with convenience. Two locks in one, it provides the ability to open and lock both a latch bolt and deadbolt with a single lever motion. BLE technology offers real-time remote access and control of multiple locks and devices, including a 3000 audit trail from the TownSteel app. It is UL 10C 3 Hour Rated. Full specs and available hardware finishes are available in the supplier's downloadable digital catalog.

Hikvision
Booth #18037

Hikvision's Performance Series Thermal Cameras take thermal imaging from niche to mainstream. Specifically designed for short-range detection, the cameras are best suited and priced for residential, commercial and industrial areas. The thermal-optical turret camera, DS-2TD 1217-2/V1, combines wide-angle thermal and optical cameras with thermal imaging-based fire detection, temperature monitoring, cigarette smoking detection, DeepinView intrusion detection and abnormal sound detection. The 160x120 vanadium oxide thermal detector provides outstanding thermal image quality upscaled to an output resolution of 320x240 with a dramatically downscaled cost.

LiftMaster
Booth #22117

The HDSL24UL and HDFSL24UL smart commercial slide gate operators from LiftMaster feature a direct drive high-efficiency powertrain, custom gear box, and brushless motor engineered for up to 6 million cycles. Perfect for oversized gates, the HDSL24UL moves gates up to 3,000 pounds and 75 feet in length.

Request more info at www.securityinfowatch.com/21124957

Louroe Electronics
Booth #8038

TLO-A is a two-way communications device from Louroe featuring an active speaker for high-volume penetration and a microphone for superior sound capture in a single, weather-resistant housing. For outdoor or large coverage applications, its omni-directional mic detects audio within a 30-foot diameter of the device.

Request more info at www.securityinfowatch.com/21124929

Mobotix
Booth #18117

The Mobotix M73 is an entire video surveillance solution housed within a single decentralized IoT device. Featuring three separate sensors, it can be fully customized to use optical, thermal, infrared, day/night, or audio functionalities simultaneously. Equipped with the MOBOTIX 7 Universal Plug-In platform, it can leverage several AI-based applications.

National Monitoring Center
Booth #2071

Netwatch Proactive Video Monitoring (PVM) service from National Monitoring Center (NMC) uses smart analytics to identify suspicious activities while filtering out nuisance alarms. Within seconds, threats are presented to its intervention specialists, who provide a live audio warning and continued real-time audio and visual assistance to the authorities.

Request more info at www.securityinfowatch.com/21124954

PACOM
Booth #23067

The PACOM GMS multi-site security management platform provides integration between access control, intrusion, video, intercom, and virtually any building management or security solution. It is designed to manage thousands of locations simultaneously through a single interface, while providing leading availability and redundancy. Features include: Powerful GUI; identity management; visual verification; alarm monitoring; remote managed services; graphics control; and more. It provides scalability and flexibility, whether its security management of 20 locations or more than several thousand locations simultaneously.

Tane Alarm Products
Booth #14137

Tane Alarm Products has introduced its own series of Interlogix-compatible 319.5MHz wireless contacts, model TWC 319.5R. The contacts are designed to replace most of the Interlogix and Qolsys wireless alarm contacts operating on the 319.5 MHz frequency. The Honeywell- and 2GiG-compatible TWC 345R wireless alarm contact also operates on the 345MHz frequency. Both wireless alarm contacts feature a low-profile design and five-year battery life using a premium CR2032 battery. Tane Wireless Contacts will soon add a series of wireless products, including a PIR and other specialty offerings.

Premio
Booth #20136

Premio's RCO-6100 Rugged NVR Industrial Computer is a powerful edge machine dedicated for compute-intensive deployments in embedded IoT applications. It is configurable with Intel's 9th (Coffee Lake Refresh) Generation Core i3, i5, and also features a rugged fanless design and heatsink chassis to perform in harsh environments.

Request more info at www.securityinfowatch.com/21124681

Speco Technologies
Booth #23015

Speco Access is an embedded browser and app managed access control system that is affordable, feature rich and scalable. There is no software to be installed, and it is integrated with the supplier's NR Series recorders. It provides an innovative overall security solution of video surveillance plus an access control system with auto live camera pop up, viewing of a camera and event tagging, door control and threat level lockdown. As an out-of-the-box ready integrated system, dealers can provide value-leading capabilities without a premium investment.

Request more info at www.securityinfowatch.com/21125175

HID Global
Booth #11063

Signo is a signature line of access control readers by HID Global that offers security with a sleek, upscale design. Highly versatile, they support the widest range of credential technologies, including HID Mobile Access. This new reader line delivers ultra-secure cryptographic keys on certified secure element hardware. It is connected to the future with out-of-the-box OSDP support for secure bi-directional communication, and is designed to connect and manage readers remotely. Reliable across a vast array of use cases, it provides optimized read range for powerful access control.

Safety Technology International (STI)
Booth #30044

The UL/cUL Listed Global ReSet Series from STI is ideal for use as a button to call police, alert of an emergency, allow authorized exits, to lockdown a building, and more. The indoor/outdoor resettable push-button simulates break glass activation without the broken glass.

Request more info at www.securityinfowatch.com/21124137

Safe Zone
Booth #2045

The Safe Zone Gunfire Detection System combines infrared and sound detection technologies with cloud-based data analysis to respond within 10 seconds to an active shooter situation, automatically communicating with key personnel including first responders, school administrators and parents. By alerting authorities quickly, these incidents can be ended sooner.

Request more info at www.securityinfowatch.com/21069600
Telguard
Booth #18109

The TG-PEM is Telguard's newest UL-listed accessory compatible with its TG-7 Series communicators. Its power module enables integrators to run the TG7-FS off of 24-volt panel power, so an electrician is not needed to install an outlet. A zone expander enables integrators to expand the TG-7 intrusion system to eight highly configurable zones. In a commercial fire installation scenario where there is no DACT, the TG-PEM can be used to connect the TG-7FS to the FACP outputs to deliver fire alarm, trouble and supervisory events.
