PA-250 Paging Amplifier from Viking Electronics

The PA-250 Paging Amplifier from Viking Electronics combines loud ringing, voice paging and background music into one amplifier for easy broadcasting. The compact design fits into a single 1U rack space and can be used with both new and previously installed paging systems. The unit features individual level controls with LED indicators for each input, automatic peak limiting, multiple amplifier protection modes, an adjustable Automatic Level Control, and bass and treble controls.

Alula Glass Break Sensors

Alula's new glass break sensors identify the sound of breaking glass and transmits a signal to a Connect+ panel when mounted 4-25 feet from a protected window. It features adjustable sensitivity so it can be fine-tuned to only alert when it should. It also features instant intrusion alarm reporting and app notification. Models include the RE629 (Connect+), RE129 (Interlogix compatible) and RE 229 (Honeywell and 2GIG compatible).

Vanderbilt Mobile ACT ID

Vanderbilt Mobile ACT ID features zero-touch, cloud-issued credentials for seamless integration into its access control solutions. Powered by WaveLynx Technologies, it communicates directly to each platform for authentication to help streamline access. The free credentials are supported on NFC for Android and Bluetooth Low Energy for iOS, and features fully authenticated issuance from a secure cloud credential authority. It does not require any subscriptions or fees.

TCIV+ Video Intercom from Zenitel

Zenitel's TCIV+ (Turbine Compact Intercom Video) Station employs a 10W speaker, matching 10W class D amplifier, and digital MEMS microphone to provide open, duplex, hands-free communication. With the ability to be used as a public address speaker, the station is well protected from damage and destruction thanks to a solid aluminum, die-cast frame. Cyber defensibility is addressed using integrated IEEE 802.1X network access control.

Aiphone's IXG-MK IP Video Guard Station

Aiphone's IXG-MK IP Video Guard Station provides visitors with a convenient way to call a building's concierge, receptionist or security guard directly from the entrance station. It features a seven-inch touchscreen for clear video identification, video communication between guard stations, call recording, and the ability to forward calls directly to a tenant. Ideal for multi-tenant housing or offices, it stores up to 9,999 units in its address book and maintains a history of calls received.

Dallmeier Panomera S-Series Cameras

The Panomera S-Series multifocal sensor camera systems from Dallmeier combine a total overview with an unlimited number of detail zooms in high resolution that can be opened with a click of the mouse, like "virtual" PTZ cameras. Each of the up to eight sensors per camera is equipped with integrated Artificial Intelligence (AI), so analysis can be carried out directly in the camera (on the edge), from people counting to "Appearance Search."

Control4 Chime Video Doorbell

SnapAV has unveiled the Control4 Chime Video Doorbell, designed to leverage all of the capabilities of the sophisticated Control4 OS 3 to enable integrators to create automated actions customized to a customer. Advanced motion detection with five adjustable zones keeps homeowners alerted to important movements around the front door. It comes in two metallic finishes (black and satin-nickel), and features a 5-megapixel camera.

Seagate's SkyHawk AI 18TB Hard Drive

Seagate Technology's 18TB SkyHawk Artificial Intelligence hard drive is purpose-built for artificial intelligence (AI)-enabled surveillance solutions, enabling quicker and smarter decisions. It supports deep learning and machine learning workload streams for Edge applications with ImagePerfectAI. It simultaneously sustains 32 AI streams alongside 64 video streams and supports multi-bay NVR and AI-enabled NVR, with a 550TB/year workload rate.

High-Definition Wisenet X PTZ PLUS cameras

Hanwha Techwin's Wisenet X PTZ PLUS cameras feature AI-based object tracking, precise PTZ control, improved pre-set accuracy, adaptive IR illumination and enhanced cybersecurity. Designed for perimeter protection and large, open-area applications such as airports, parking lots, industrial estates, stadiums and city centers, the cameras are able to capture forensic-level image quality at a distance of up to 650 feet (200 meters).

DMP Entré v8.7.3 Access Control Management Software

Whether managing thousands of panels or only a few, DMP's Entré version 8.7.3 Access Control Management Software includes several enhancements to enable integrators to more easily make additions or edits. Among these new features, the software enables panels to be added, and configured – including adjusting settings and creating areas and zones – all from one interface. Additionally, when a personnel record is deleted, the system now automatically deletes any associated credentials.

IrisTime Biometric Time and Attendance Solution from Iris ID

Iris ID's IrisTime biometric time and attendance platform uses a fusion of iris and face recognition to increase accuracy and convenience. A contactless solution, the unit is unaffected by employees wearing personal protective equipment such as gloves, masks and goggles. Employee authentication takes less than a second, with a screen displaying an employee's name, company I.D. number and photo, along with the time and date of the activity.

LIVE on Nov. 18

Opening the doors of analytics with standards

With new industry standards providing common communication interfaces for metadata, learn how end-users and systems integrators will be able to flexibly mix and match solutions from different providers of analytics, edge devices and VMS and cloud services into one, cohesive security system.

Simplex Pushbutton Locks from dormakaba

The Simplex pushbutton lock series from dormakaba does not need cables, software or batteries. The Simplex 1000/L1000 Series allows users to gain entry from the outside using a combination. It is ideal for locations with high people flow, such as data centers, employee entrances, apartments, and restricted areas where an audit trail is not required. The Simplex 5000 Series is a fully mechanical lock that provides exterior access by combination, while allowing free egress.

Intelligent Media Converter from ComNet

ComNet's new series of intelligent media converters provide additional benefits over traditional distance, extending fiber optic media converters. They add redundancy by offering two SFP fiber ports that allow for redundant upload paths and a multiplexing feature for port isolation that prevents network video flooding of multicast traffic redundant. Functionality for easy field deployment includes DIP switch-based operation of RSFP for creating redundant fiber connections.

Honeywell's 60 Series 5MP Cameras

Honeywell's 60 Series line of 5MP IP cameras deliver a clear picture that can be zoomed in from greater distances, allowing for fewer cameras to cover a larger area of view. Compliant with the National Defense Authorization Act 2019 (NDAA) Section 889, the cameras easily integrate with the Honeywell MAXPRO VMS/NVR range and ADPRO iFT/iFT-E IP NVRs. The cameras feature TLS1.2 (HTTPS) encrypted streaming, adhere to the Payment Card Industry Data Security Standard (PCI-DSS) and include a built-in NIST FIPS encryption chipset.

WD Purple 18TB Hard Drives

The WD Purple 18TB HDD is designed for NVRs and video analytics appliances as well as GPU-enabled devices that can deliver both real-time and post analytics applications. Offering 28 percent more capacity than the previous generation, the drive features AllFrame AI technology that enables recording of up to 64 high-definition cameras, as well as an additional 32 streams for deep learning analytics.

HID Global's FARGO INK1000 Printer and Encoder

The HID FARGO INK1000 printer and encoder is a thermal inkjet solution that brings secure, personalized credential issuance for entry- and mid-level markets. The unit eliminates the print ribbons and specialized card media required by alternative direct-to-card (DTC) desktop solutions that use dye sublimation technology. The easy-to-install snap-in cartridges deliver the simplicity and reliability of inkjet printers and contain specially formulated inks for creating fade-resistant images and text that adhere to standard, off-the-shelf polyvinyl chloride (PVC) cards.

Dedrone's RF-360 Drone Detection Sensor

Dedrone's RF-360 detects, classifies and localizes unwanted or malicious drones and their remote controls on the basis of their radio signals at great distances and in areas with high radio traffic, for example in cities or at airports. With a detection range of up to 5 km, it also filters RF noise to reliably and quickly detect specific drone communication signals. It also features integrated LTE and GPS.

FLIR Elara FR-345-EST Skin Temperature Screening Camera

The FLIR Elara FR-345-EST is a fixed-mount radiometric thermal security camera that measures elevated skin temperature (EST) accurately without contact or the need for a reference temperature source. The camera automatically guides to the part of the body that most closely correlates to core body temperature: the inner-canthus (the inner eye of a human face). It can serve as a stand-alone system without the need for desktop software or as part of a broader access control program.

STI-9100 Series Thermostat Protectors

The STI-9100 Series Thermostat Protector with key lock helps protect thermostats and energy sensors. The cover mounts directly over the unit to prevent unwanted access, yet allows authorized use with the provided key. Molded of clear, 1/8 inch thick, heavy-duty polycarbonate material, it is recommended for areas vulnerable to vandalism, accidental damage or costly annoying tampering. Holes in the frame allows air to circulate freely for proper operation.
