

Retail Security Solutions

Storefront Deadlatch from SALTO

The SALTO XS4 One Deadlatch provides electronic access control to aluminum-framed glass doors, which gives retail storefronts, commercial buildings, and healthcare the power to remotely manage access. Compatible with the supplier's SVN, BLUEnet Wireless and KS cloud-based technology, it is easy to retrofit and install, and it has no wires.

Searchlight for Retail from March Networks

March Networks Searchlight combines enterprise-

class video management with intelligent software applications to help QSRs, c-stores and other retailers cut losses from theft, oversee operations, improve service and drive profitability. Available as a cloud-based solution, it combines hybrid NVRs with intelligent data analytics, resulting in a highly effective loss prevention and business optimization platform.

Storefront Panic Device from ASSA ABLOY

The Rockwood Storefront Panic Device (PDU8500) from ASSA ABLOY incorporates

a patent pending flat security latch that ensures doors remain locked and secure when a business is closed. Available for both medium and wide stile doors, it includes a selection of cylinder, pull, and finish choices. The ADA compliant unit is ANSI/BHMA A156.3-2014 Grade 1 Certified (32 and 32D finishes only), as well as UL305 CAN/ULC-S132-07 compliant.

Identiv Eco-Friendly RFID and NFC Tags

Identiv's Eco-Friendly radio frequency identification (RFID) and near field communication (NFC) inlays are non-etched, paper-based transponder inlays that reduce the traditional use of PET-based substrates and byproducts. The tags are manufactured on renewable paper, without plastic layers and harmful chemicals, and boast a low carbon footprint. They come in both eco-friendly, non-etched high-frequency (HF)/NFC and UHF inlays.

Alpha ShoeLok from Checkpoint Systems

The Alpha ShoeLok is a specialized tag from Checkpoint Systems to protect against retail footwear theft. The one-piece alarming tag easily clamps onto footwear that is challenging to protect. The ratcheting compression mechanism attaches to the shoe – no pin or lanyard required, and no marks left behind after removal. Available in AM or RF technology.

Storefront Exit Device from SDC

SDC's S5000 is a heavy duty, code-compliant alternative to magnetic locks for storefront applications. The UL305 panic-rated exit device is American made, featuring all-metal construction suited for aluminum glass entrances for both manual and automated door openings and new or retrofit applications. The product also comes with optional Request-to-Exit monitoring for access control compatibility.

Thruvision LPC (Loss Prevention Camera) People Screening Solution

Designed for distribution centers and similar applications, Thruvision's LPC (Loss Prevention Camera) suite of people screening solutions use proprietary passive terahertz detection technology to safely and reliably detect metallic and non-metallic items concealed in a person's clothing at distances up to nine feet. Developed from TSA "vetted and approved" technology, the LPC range also reliably detects guns, knives and other weapons, helping improve workplace safety.
