

FEATURED EXHIBITOR

Napco Security Technologies

Booth 12031

Napco's new dual SIM/ dual path StarLink Fire MAX 2 Dual Cell/IP Communicators for universal Commercial Fire FACUs provide alarm reporting on Verizon and AT&T in one unit. This enables integrators to carry one model on the truck and to choose either sole path, cell, or dual path cell/IP reporting (simply selectable by plan). The unit is self-supervised and comes with preinstalled EOLR inputs and Form C-Outputs. See it at ISC West Booth 12031 with demos and drinks on Wednesday and Thursday from 3-5 p.m.

FEATURED EXHIBITOR

Morse Watchmans

Booth 11109

The Morse Watchmans KeyWatcher Touch electronic key control system is a scalable key control solution for organizations looking to secure, manage, and track keys and other assets. With a 7-inch touchscreen and patented SmartKey system with KeyAnywhere technology, it is easy to withdraw and return a key securely to any key cabinet located within an enterprise. The system shows which keys are out, who has them, and when they are due for return, with instant audit reports available.

Access Wireless Data Solutions

Booth 1097

The Peplink MAX BR1 Mini, including Mini Core and Mini 5G models, provides single modem cellular connectivity with ruggedized cases and enhanced environmental features. The Mini's PoE power input suits locations with weak cellular signals, enabling external use without intricate antenna cabling.

► Learn more at www.securityinfowatch.com/53097338

Acre

Booth 20059

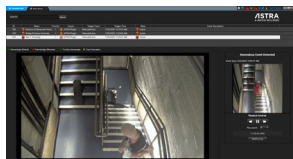

Acre's Access Control solution integrates cameras, visitor management, and sensors via its RESTful API. It unlocks business efficiencies with FITS process automation. ISO 27001 certified, it can be accessed across devices and systems, on-premises or in the cloud.

► Learn more at www.securityinfowatch.com/53096801

Active Intelligence

Booth 33061

ASTRA is Active Intelligence's real-time autonomous video anomaly detection solution, transforming video security systems from a forensic investigation tool to a real-time threat prevention tool. Integrating with VMS platforms, it puts virtual eyes on video feeds, alerting operators as soon as an anomaly is detected.

► Learn more at www.securityinfowatch.com/21296023

AES Corporation

Booth 6034

The new 7207 Wireless Extender from AES Corporation is for installations with network connectivity challenges due to structures and building materials. It eliminates long cable runs from a subscriber to a remote antenna by acting as a wireless network bridge.

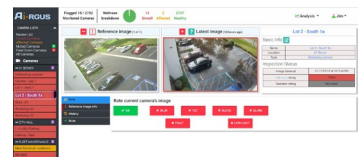

► Learn more at www.securityinfowatch.com/53096819

Ai-RGUS

Booth 33090

Ai-RGUS is an artificial intelligence-based software solution that makes security camera system maintenance easy. Initially developed to manage Duke University's 2,000-plus camera system, it automatically alerts of any problems, including cameras down/unclear views, and cybersecurity vulnerabilities.

FEATURED EXHIBITOR

Hanwha Vision

Booth 14025

Hanwha Vision is highlighting SolidEDGE, its true serverless camera system with onboard SSD storage and an embedded WAVE VMS server. The cloud-managed solution addresses the need for scalable surveillance solutions requiring multi-camera recording, remote access, and on-premise security system management. Cameras are available in two models, the PNV-A6081R-E1T (1TB onboard storage capacity) and PNV-A6081R-E2T (2TB). Each camera can connect and record up to five additional cameras, bringing the total number of cameras in a system to six, including the original SolidEDGE camera's video stream.

► Learn more at www.securityinfowatch.com/53062240

AIC Inc.

Booth 34054

AIC's TB116-DL Network Security Appliance is both FIPS 140-3 and NEBS compliant. A key feature is its onboard Baseboard Management Controller, which facilitates advanced system management and IPMI control. This allows for effortless remote monitoring and management.

► Learn more at www.securityinfowatch.com/53096887

Allegion

Booth 20055

Schlage XE360 Series wireless locks are designed for multi-family properties.

They operate in an offline or No-Tour environment and can be integrated with Allegion and third-party PACS and Proptech systems. The locks support the latest credential technologies and are available as Tubular, Mortise, and Exit Trim.

► Learn more at www.securityinfowatch.com/53097034

AIRA Corporation

Booth 23002

airaTrack streamlines the video surveillance investigation process by using AI and facial recognition software to target a person, conduct an investigation, and generate a report. It can be integrated into existing cameras or VMS, and is capable of cross-camera searching for targets.

► Learn more at www.securityinfowatch.com/53096875

Ajax Systems

Booth 1103

Ajax Systems' new line of video surveillance products include TurretCam, BulletCam, and DomeCam Mini models. Each includes a lens with a viewing angle of 85 or 110 degrees, 3K or 4K resolution, true WDR, and a digital microphone. The Ajax NVR offers integration with the Ajax VMS.

► Learn more at www.securityinfowatch.com/53097191

Altronix

Booth 11073

Pre-wired Trove Plus Access and Power Integration kits from Altronix streamline deployment and simplify installation. It is scalable and comes in wall- and rack-mount configurations that include power distribution, wire management, and wire harnesses to quickly connect access controllers from leading brands.

dormakaba

Booth 18019

The Alvarado SRD from dormakaba Group is a standardized, automatic, secured revolving door designed to prevent tailgating and piggybacking while maximizing traffic flow with throughput rates up to 44 people per minute. The SRD's sensor technology makes it ideal for unmanned high-traffic entrances that require a high level of security, such as universities, government facilities, test labs, and data centers. Available in three models, it can be configured for entry, exit, or bidirectional authentication, allowing facilities to track occupancy in real-time.

FEATURED EXHIBITOR

OpenEye

Booth 22031

OpenEye's cloud cameras deliver an all-in-one video solution with onboard recording and advanced analytics processing, providing the benefits of OpenEye Web Services (OWS) in a flexible serverless architecture. Cloud cameras allow infinite scalability with every camera added to a location bringing its own storage and processing power, enabling users to seamlessly scale over time with no limitations on channel count or system resources. Locations with existing recorders can also add cloud cameras to expand storage or analytics capabilities, making OWS a flexible deployment architecture.

Integrated Control Technology (ICT)

Booth 13089

ICT's Protege Wireless Locks for MDUs and other buildings enable only one credential to access a door. The Protege Cartridge Mortise and Motorized Deadbolt locks support both 13.56MHz MIFARE DESFire smart cards and Bluetooth Low-Energy mobile credentials.

➤ Learn more at www.securityinfowatch.com/53078594

Kaadas

Booth 31097

Users can unlock the KA211 Z-Wave Touchpad Deadbolt via backlit touchpad, Z-Wave system app, or with a traditional key. Up to 250 PIN codes and temporary one-time codes allow users to provide access to guests, and they include lockout and away modes.

➤ Learn more at www.securityinfowatch.com/53097322

Iris ID

Booth 28057

The IrisAccess iCAM 7S series can be used for access control and workforce management. The first SIA OSDP secure profile-verified iris biometric device, features include a large targeting mirror and a simple interactive user interface with auto-focus lens for rapid, high-quality iris acquisition.

➤ Learn more at www.securityinfowatch.com/53097005

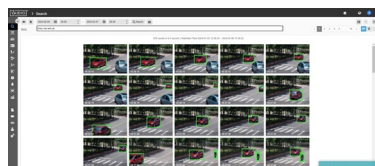

KABAM Robotics

Booth 3083

The Halo outdoor security robot from KABAM Robotics features a robust all-terrain drive system to traverse through rugged and uneven landscapes. Featuring a 360-degree field of view, it captures extensive information for comprehensive surveillance and sophisticated analytics. It comes equipped with sirens and strobe lights.

➤ Learn more at www.securityinfowatch.com/53097362

IronYun

Booth 12121

Vaidio GenAI from IronYun combines Generative AI with deep-learning-based video analytics. With natural language video search, precise object recognition, and an expanded object vocabulary of 50,000 terms, it unlocks new levels of insight and application possibilities.

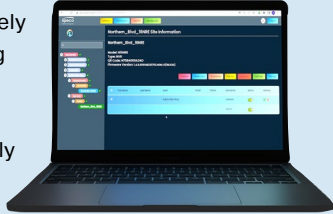

➤ Learn more at www.securityinfowatch.com/53096953

FEATURED EXHIBITOR

Speco Technologies

Booth 20035

Integrators can manage a customer's sites remotely while earning Recurring Monthly Revenue with Speco's SecureGuard Dashboard. The recently launched Central Management Dashboard helps integrators remotely configure and oversee install applications, minimizing the need for on-site visits, and gaining remote administration control over a customer's video surveillance systems. Proactively check the health status of systems and always be aware in the event of a dropped connection, enabling integrators to sometimes notify customers before they even notice an offline camera or recorder.

FEATURED EXHIBITOR

Viking Electronics

Booth 7037

The compact and sleek X-205-BK delivers HD video and voice communication via SIP VoIP phone systems, cloud providers, or third-party apps. Its built-in IP video camera supports both H.264 and MJPEG video compression via RTSP, offering low-light sensitivity, a wide viewing angle, and the capability to output both call and NVR video streams simultaneously at up to 1080p resolution. The intercom dials a programmed phone number and automatically cycles through backup phone numbers on busy or no answer.

► Learn more at www.securityinfowatch.com/53096814

KBC Networks

Booth 16109

The ESMGH8-P2-B 10-port managed industrial Ethernet switch from KBC has eight 10/100/1000M PoE/PoE++ ports and two Gigabit SFP ports. Using a 45 to 57 VDC power input, it can provide a total power budget of 500 watts.

► Learn more at www.securityinfowatch.com/53096989

Lantronix

Booth 7117

The Lantronix 8-port SM8TBT2SA and 24-port SM24TBT4SA L2 managed switches offer a combination of PoE+ and PoE++ ports.

The switches are integrated with Lantronix's cloud-based PercepXion software, providing comprehensive device life cycle management, enterprise application integration, and data analytics.

► Learn more at www.securityinfowatch.com/53097319

LifeSafety Power by ASSA ABLOY

Booth 7117

Now carrying the UL 294 Standard Listing, LifeSafety Power's Helix ATS PDU is a combination Automatic Transfer Switch (ATS) and Power Distribution Unit (PDU) designed to facilitate maximum system uptime and redundancy in mission-critical applications. It serves as a rack power distribution device with network management.

► Learn more at www.securityinfowatch.com/21296033

LiftMaster

Booth 26069

Designed for large communities and multi-family properties, LiftMaster's new Smart Video Intercom – L allows property managers and residents to manage and monitor guest access remotely while enhancing the security of the property with video-enabled access controls.

► Learn more at www.securityinfowatch.com/53097159

LMN Software

Booth 35077

LMN's EdgeSentry ES-304 is a network monitoring and security appliance that manages security and device availability for security networks inside the firewall. It enables an average technician to map, monitor, harden, secure, and document a security network in a matter of minutes.

► Learn more at www.securityinfowatch.com/53097011

FEATURED EXHIBITOR

Camden Door Controls

Booth 7025

The CX-EPD1289L grade 1 surface mount RIM strike with latch monitoring from Camden Door Controls offers a 'Universal' strike design that ensures installation flexibility. The strike operates with up to 15 pounds of preload pressure, eliminating doors that go out of alignment after the strike is installed. Features include UL security and fire ratings, field configured latch monitoring, selectable fail safe, fail-secure operation, dual voltage, and a five-year no-hassle product warranty.

FEATURED EXHIBITOR

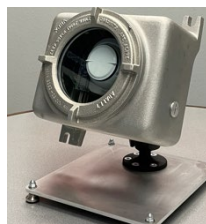

Prometheus Security Group

Booth 32107

The V100 Video Management System consists of PL1N-certified VICADS-4 software hosted on Linux servers (HPC Cluster – a supercomputer architecture), providing built-in encryption, redundancy, and data fusion to keep users ahead of emerging threats. This combined architecture provides high reliability and greater processing power. Its multi-node cluster model allows for critical backups, provides a common operating picture for rapid decision-making and response, video assessment, and easy installation for protecting critical information and disaster recovery.

➤ Learn more at www.securityinfowatch.com/53098499

Magnasphere Corp.

Booth 24117

Magnasphere's MSK-101-MM-HLOC radar motion sensor comes in an explosion-proof housing for hazardous locations. It is UL-639 listed and HERO/HERF/HERP certified. The explosion-proof/flame-proof housing is ideal for military, mining, agriculture, chemical, and petroleum refining hazardous location facilities.

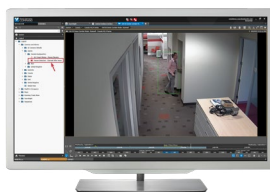

➤ Learn more at www.securityinfowatch.com/53097174

March Networks

Booth 26041

March Networks Cloud Storage Solutions feature redundant cloud storage backup. Extend the length of time video is stored for compliance requirements, and address varied bandwidth by location by pushing all or some video to the cloud.

➤ Learn more at www.securityinfowatch.com/53097172

Milestone Systems

Booth 14039

Milestone Systems' XProtect VMS 2023 R3 Update increases operational efficiency, collaboration, and system control with its intelligent, customizable foundation that transforms live and recorded video data into actionable insights. Role-based notifications enable profiles that route alerts to specific users by function.

➤ Learn more at www.securityinfowatch.com/53078118

Nice North America

Booth 22005

The 2GIG E+ Extended Range intrusion and notification sensors from Nice North America include coverage for door/window, motion, smoke and glass break detectors. Enhancements include increased battery life, two-way encryption, hassle-free installation, and a user-friendly enrollment process.

➤ Learn more at www.securityinfowatch.com/53097512

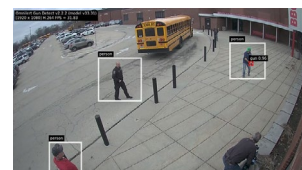

Omnilert

Booth 3059

Omnilert's third-generation AI visual gun detection system delivers a unique combination of detection, verification, activation, and notification. Ideal for schools, universities, hospitals, retail and commercial buildings, it features improved hardware efficiency, enterprise management, and gun detection accuracy.

➤ Learn more at www.securityinfowatch.com/53097111

Oosto

Booth 26125

Oosto OnWatch is a watchlist alerting solution that identifies persons of interest (POI) in real-time with live facial recognition. Features include one-touch license porting, automated POI alerting, privacy compliance, video search, centralized dashboard, existing infrastructure optimization, and Oosto Inquiry for video search.

➤ Learn more at www.securityinfowatch.com/21278810

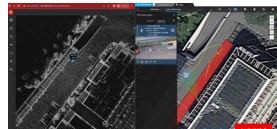

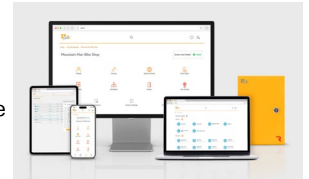

Prodatakey

Booth 31053

PDK.io 2.0 supports enterprise installations managed across multiple buildings and sites.

Doors connected to disparate PDK Cloud Nodes can now be managed as a single customer system, and credential holders can reside in a single database band and be distributed across one or many locations.

➤ Learn more at www.securityinfowatch.com/21238074

Outsight

Booth 31101

Outsight's Perimeter Protection and Intrusion Detection solution, seamlessly integrated with Genetec's Security Center, leverages advanced 3D LiDAR technology to surveil outdoor and indoor spaces, triggers alerts upon detecting intrusions, and continuously tracks intruders in real-time with centimeter precision.

➤ Learn more at www.securityinfowatch.com/53097350

Quanergy Solutions

Booth 18071

Quanergy Q-Track combines advanced 3D LiDAR sensors and AI-driven smart perception software with the ability to simultaneously detect, classify and track 600+ individuals/objects over vast areas – even in complete darkness. It integrates with more than 40 VMS, PSIMs, ONVIF cameras, and analytics platforms.

➤ Learn more at www.securityinfowatch.com/53069557

Platinum Tools

Booth 3036

The PTS (Pass Through Standard) Pro Crimp Tool combines multiple tools into one sleek design. It allows for the termination of both ezEX-RJ45 connectors and legacy EZ-RJ45 connectors in a single tool with no part changes.

➤ Learn more at www.securityinfowatch.com/53096044

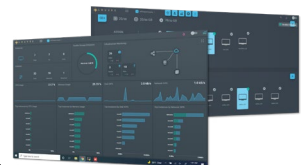

Quantum Corporation

Booth 12115

Quantum Corp. will unveil version 5.0 of its Unified Surveillance Platform (USP), which introduces patented video data reduction techniques to record thousands of video streams simultaneously at maximum uptime with fewer servers required, reducing risk of hardware failure.

➤ Learn more at www.securityinfowatch.com/53096859

Premio

Booth 2089

Premio's JCO-6000-OGX is a rugged fanless Edge AI computer. Equipped with 8 GMSL cameras, up to four mix-and-match EDGEBoost I/O brackets, and supports one 10 GbE fast speed Ethernet port, ideal applications include robotics, industrial automation, intelligent transportation, and smart cities.

➤ Learn more at www.securityinfowatch.com/53096842

RBtec Perimeter Security Systems

Booth 3071

The RaySense fiber optic sensor cable from RBtec Perimeter Security Systems is a DAS system that integrates advanced AI technology to deliver precise intrusion detection while minimizing false alarms. Designed for medium-range applications, it is versatile for a wide range of security needs.

➤ Learn more at www.securityinfowatch.com/21295731

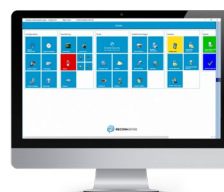

Princeton Identity

Booth 23004

Princeton Identity's EyeAllow authenticates users via iris and face biometrics, RFID cards, high-frequency smart cards, mobile credentials, biometrics-on cards, and PIN codes. It brings heightened security, speed, and convenience to access control, time and attendance, and point-of-sale applications.

➤ Learn more at www.securityinfowatch.com/53097152

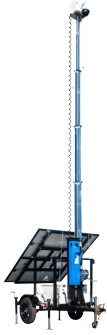

ReconaSense

Booth 3113

The ReconaSense enterprise-grade access control platform is FICAM-certified and cloud-architected. It uses real-time data and advanced threat analysis to streamline operations, set protocol responses, conduct threat analyses, and centralize data points with real-time analytics, and customizable reports.

➤ Learn more at www.securityinfowatch.com/21069602

Reconview

Booth 16141

Reconview's Mobiletalk is a patent-pending solution used for outdoor security applications. At 5MP resolution, it is a faster way to dispatch emergency services than traditional 911. During an emergency, at the push of a button, a user can reach a security operator.

► Learn more at www.securityinfowatch.com/53097170

Research Electronics International (REI)

Booth 27116

REI's Tactical TSCM Kit (TTK) is a travel-friendly, deployment-ready system for detecting and locating hidden electronics, transmitters, microphones, and other illicit surveillance devices. It is equipped with MESA 2.0, a hand-held spectrum analyzer, and ANDRE near-field detection receiver for detecting and locating wrongful transmitters.

► Learn more at www.securityinfowatch.com/53097352

RGB Spectrum

Booth 7050

The Superview IPX is a versatile multiview display processor suitable for desktop or wall-mount use. It is compatible with displays ranging from monitors to LED video walls, with 4k/60 resolution and up to 8 baseband and IP video signals in customizable windows.

► Learn more at www.securityinfowatch.com/53096876

Safetrust

Booth L6

The Safetrust IoT Sensor integrates a camera, LiDAR, and radar sensors with embedded AI computing to deliver real-time local insights. Its AI applications adapt based on user-defined policies, providing tailored security, even in critical scenarios like active shooter incidents.

► Learn more at www.securityinfowatch.com/53096839

Safety Technology International (STI)

Booth 29045

STI's wireless-friendly, non-metallic NEMA 4X fiberglass and polycarbonate enclosures offer protection for equipment against rain, sleet, snow, splashing water, hose-directed water, as well as vandalism, tampering, and theft. They come in a range of sizes, climate control options, and power distribution choices.

► Learn more at www.securityinfowatch.com/12389129

SARGENT & Corbin Russwin by ASSA ABLOY

Booth 8061

SARGENT PE80 and Corbin Russwin PED4000/PED5000 Series exit devices

from ASSA ABLOY are engineered to meet the ever-evolving needs of modern buildings. They are engineered for an extended lifespan to withstand heavy usage.

► Learn more at www.securityinfowatch.com/53061369

Security Door Controls (SDC)

Booth 21109

SDC's Engineered System Design Services for multi-door projects eliminate man-hours for programming, reduce mismatched product conflicts, lessen maintenance headaches, and more. The services are based on the company's UR Series Door Controllers, which feature centralized wiring for uniformity across multiple installation applications.

► Learn more at www.securityinfowatch.com/12328760

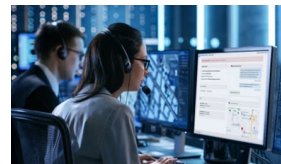

Semtech (formerly Sierra Wireless)

Booth 4112

AirLink XR60 is the world's smallest rugged 5G router. It combines 5G, Wi-Fi 6, and gigabit Ethernet with a ruggedized design built to withstand harsh industrial and mobile environments. For a limited time, it includes five years of AirLink Complete, Semtech's subscription support service.

► Learn more at www.securityinfowatch.com/53097334

Shooter Detection Systems (SDS)

Booth 23045

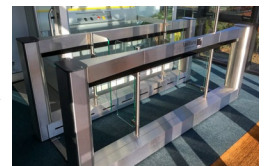

ResponderLink sends gunshot detection data to a 24/7 call center, removing the burden of data collection and reporting from employees or security staff. A trained call center professional coordinates response between 911, first responders, and the customer via a shared real-time dashboard.

► Learn more at www.securityinfowatch.com/53058119

Smarter Security

Booth 5089

Smarter Security's Fastlane Interlock is a dual-barrier turnstile designed to stop tailgating and unauthorized entry. It offers single or multiple authentication methods. Its dual barriers can be supplied in various heights and can operate independently yet remain interlocked.

► Learn more at www.securityinfowatch.com/53097327

SMP Robotics

Booth 20137

SMP Robotics advanced security robots are designed for proactive outdoor surveillance. They are tailored for multi-level perimeter patrolling, can integrate with existing security frameworks, efficiently manage power, and facilitating real-time data exchange for anomaly detection and incident response.

➤ Learn more at www.securityinfowatch.com/53097316

Snap One

Booth 10053

The NDAA-certified ClareVision Smart Video Doorbell is ideal for standalone surveillance or as part of a ClareOne smart home system. It combines 1080p video capture, AI-based smart analytics, 2.4GHz and 5GHz Wi-Fi, and two-way voice calling into a slim device that uses existing doorbell wires for power.

➤ Learn more at www.securityinfowatch.com/53096042

Solink

Booth 24008

Solink's Video Alarm Tablet adds an on-site touchpoint for authorized users to arm/disarm video alarms via in-person or remote PIN management. The video alarm tablet includes audio alerts and an intercom system for added security.

➤ Learn more at www.securityinfowatch.com/53096812

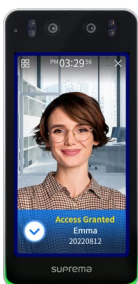

Sonitrol

Booth 23059

Sonitrol will be previewing its cutting-edge security integration management platform, Sonitrol CORE, at ISC West. The centrally controlled cloud-based software platform offers the flexibility, scalability, affordability, and functionality demanded by organizations wishing to integrate their access control and intrusion detection systems.

➤ Learn more at www.securityinfowatch.com/53097192

Suprema

Booth 17089

Suprema's BioStation 3 provides 100% contactless authentication methods, including facial verification, QR codes and barcodes, mobile access cards, RFID cards, virtual PIN and intercom. With a slim and compact form factor similar in size to an iPhone, it is easy to install and suitable for any door or building.

➤ Learn more at www.securityinfowatch.com/21285833

TagMaster North America

Booth 1102

The CT-45 LPR camera from TagMaster North America features dual cameras (IR and color) in a weather-proof housing. Other features include a varifocal lens, PoE++, and onboard processing with a dynamic OCR engine.

➤ Learn more at www.securityinfowatch.com/53096823

Talkphone

Booth 2083

Talkphone's new wireless solar cellular blue light phone towers are ideal for providing an element of safety in remote environments. The base configuration option is designed for voice communication, lighting, and cellular status alerting; an advanced configuration option can incorporate IP cameras.

➤ Learn more at www.securityinfowatch.com/53097176

Telaeris Inc.

Booth 7042

XPressEntry XPID series handheld badge and biometric readers from Telaeris enhance access control and security management by providing a flexible, mobile solution that goes beyond traditional door readers. They also now feature a more robust security framework with Android 13.

➤ Learn more at www.securityinfowatch.com/1257785

Telecor

Booth 5040

Telecor ePanic is a mobile duress button that provides the ability to initiate an emergency alert from any location in a facility. The location will be displayed on an administrative and visual console and initiate two-way communication between the closest network speaker and the console.

➤ Learn more at www.securityinfowatch.com/53097372

Teledyne FLIR

Booth 29075

The FLIR FC-Series AI camera tightens perimeter security, enhances situational awareness, and reduces false alarms. With thermal sensitivity of <35 mK NETD and AI analytics that combine both Deep Neural Network and motion analytics, the camera precisely classifies humans and vehicles in real-world movements.

➤ Learn more at www.securityinfowatch.com/53072482

Telguard

Booth 14109

The TG-7FE Dual Path Internet and 5G LTE-M Commercial Fire Communicator is UL and ULC compliant and integrates a wired LAN connection alongside 5G LTE-M cellular, providing redundancy for alerts when in Dual Path mode or the most reliable cellular technology when in Sole Path mode.

► Learn more at www.securityinfowatch.com/21278775

Vicon

Booth 26049

Anavio, Vicon's Unified Cloud Solution, combines video, access, and intercom with face-based authentication. Unlike traditional keycards, which can't confirm the user's identity, the Anavio Unified Intercom Reader (UIR - pictured) uses face authentication to ensure only authorized people enter a building.

► Learn more at www.securityinfowatch.com/53096885

Telit Cinterion

Booth 27095

The Telit Cinterion LE910Q1 is an industrial-grade module optimized for 3GPP Release 13 LTE Cat 1 bis technology, ideal for IoT applications like asset tracking, vehicle telematics, and remote monitoring. It delivers 4G in a compact 28.2 x 28.2 x 2.4 mm form factor.

► Learn more at www.securityinfowatch.com/53097142

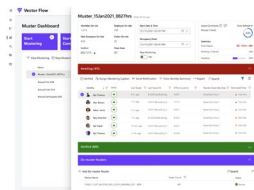

Vivotek

Booth 22015

The Vivotek SD9394-EHL boasts 4K resolution and is designed for video surveillance in expansive areas. Equipped with 250M IR illuminators and a 32x optical zoom, it enhances visibility across wide scenes. Its smart IR technology ensures comprehensive field of view coverage.

► Learn more at www.securityinfowatch.com/53096866

Vector Flow

Booth 11133

Vector Flow's Smart Mustering solution automates mustering by using card swipes, ensuring real-time visibility of personnel,

including visitors and contractors, effectively streamlining evacuations while providing essential data for first responders. The app works seamlessly with access control systems.

► Learn more at www.securityinfowatch.com/53097030

Winsted

Booth 12109

Winsted's Pinnacle control room console features best-in-class cable management with multiple connectivity options, integrated

convenience outlets and ports, Qi wireless charging, a mix of monitor arms and task lights, Personal Environmental Comfort system, and status lighting options.

► Learn more at www.securityinfowatch.com/53077227

Verkada

Booth 23029

Verkada's CP52-E PTZ camera leverages advanced AI-based analytics with "Sentry Mode," which automatically detects people as they enter its field of view. Once detected, the camera autonomously pans, tilts, and adjusts its zoom to capture high-resolution images of the individual or group.

► Learn more at www.securityinfowatch.com/53097157

ZKTeco

Booth 25041

The Omni Series all-in-one credential reader accommodates PIN codes, Low-Frequency RFID (125 kHz), High-Frequency RFID (13.56 MHz), Mobile (Bluetooth, QR Codes, NFC), and touchless biometrics (face, palm). Available with 3- or 5-inch displays, the readers are both weatherproof and vandal-resistant.

► Learn more at www.securityinfowatch.com/21290787

Viakoo

Booth 36051

The Viakoo Action Platform is an enterprise physical security and IoT service assurance, lifecycle management, and cyber hygiene platform that enables systems integrators to monitor, manage, and remediate customer infrastructure issues, such as device failures and end-of-service dates, from a single dashboard.

► Learn more at www.securityinfowatch.com/53097013

3xLOGIC

Booth 23055

3xLOGIC's X-Series edge-based deep learning analytics cameras deliver real-time, accurate and actionable data, transforming how surveillance systems can be deployed and utilized. The cameras use object, people, perimeter, and vehicle identification algorithms to provide accurate detection and tracking in dense, complex and busy environments.
